- > Replaced Sealants
- > Replaced Roof
- > Restored Masonry

Avarga Construction is an eco-conscious restoration construction firm serving the tri-state area since 2011.

We've built an enviable reputation as experts who consistently deliver excellent craftsmanship and unsurpassed service.

That's why we're the renovators of choice for New York City Designated Landmark buildings, and are on more than 90 companies' approved vendors list.

At Avarga, we use only the most highly-skilled craftsmen who examine every brick and stone for structural deficiencies, starting with the foundation. Our skilled masons choose strictly organic, biodegradable cleaning solutions for masonry and restore damaged stones to their original glory.

We know our most important asset is our customer. So we're dedicated to earning their trust with quality, integrity, extraordinary service and breakthrough results.

But the proof of success is in the results. Just take a look at a few of the buildings we've restored — from high-end luxury buildings to historic landmarks to warehouses and everything in between.

See why Avarga is the best choice for all your restoration needs.
